Diary Website - Sprint Planning Notes
Team: P03-01
Sprint: Sprint 1
Date: 20-04-2020
Attended: All the team members
Scrum Master: Hikansh Kapoor
Product Owner: Prutha Kothari
Development team: Karan Chevli, Yash Patel, Vishnu Bhatt, Harshit Singh

1. Goal

The main goal of this sprint is to design User Interface for the website and setting up the backend and database. Also setting up an Admin panel for the management of Admin & User Accounts.

2. Duration of the sprint

2 weeks

3. What is the team's vision for this sprint?

The first four items (PBI 1,2,3 and 4) would be added from Product Backlog to Sprint Backlog because their priorities are higher than other items as well as they are much more important to start the project.

In the end, we should have a basic UI for the users where they are able to Sign Up and Sign In along with customizing the diary and an admin panel for the admins where they can perform certain actions.

4. Estimation in story points

We are going to assign story points to each of our items relatively I.e., story points are assigned to tasks which require less time and high points to those which would take more time than others.

Hence, For Administration of accounts (PBI 1): 2 Story points

For Generation of Reports (PBI 2): 3 Story points

For User Authentication (PBI 3): 5 Story points

For Choosing Customization (PBI 4): 5 Story points
