Diary Website - Sprint Planning Notes
Team: P03-01
Sprint: Sprint 3
Date: 18-05-2020
Attended: All the team members
Scrum Master: Hikansh Kapoor
Product Owner: Prutha Kothari
Development team: Karan Chevli, Yash Patel, Vishnu Bhatt, Harshit Singh

1. Goal

The main goal of this sprint is to add certain features to the existing product. The features to be added include PBI 1, 7, 8 and 11 i.e. User history (for both, users and admins) and delivery options at the time of payment.

2. Duration of the sprint

2 weeks

3. What is the team's vision for this sprint?

One of the In Progress items (i.e. PBI 1) would be added to the backlog of sprint 3 and other 3 items are selected from the product backlog.

In the end, we should have all the features added so that the user can view and manage his orders as well as select from a wide range of delivery options during payment. Admin should be able to see user's orders as well.

4. Estimation in story points

We are going to assign story points to each of our items relatively I.e., story points are assigned to tasks which require less time and high points to those which would take more time than others.

Hence, For Administration of accounts(PBI 1): 2 Story points

For User side Transaction History(PBI 7): 3 Story points

For Admin Transaction History(PBI 8): 1 Story points

For delivery options(PBI 11): 1 Story points
