Diary Website - Sprint Planning Notes
Team: P03-01
Sprint: Sprint 2
Date: 04-05-2020
Attended: All the team members
Scrum Master: Hikansh Kapoor
Product Owner: Prutha Kothari
Development team: Karan Chevli, Yash Patel, Vishnu Bhatt, Harshit Singh

1. Goal

The main goal of this sprint is to set up the payment gateway required for purchasing diaries using Stripe API and connecting it to the database for storing payment IDs.

2. Duration of the sprint

2 weeks

3. What is the team's vision for this sprint?

Firstly, the unfinished items would be added from the sprint 1 backlog to sprint 2 backlog and then 2 high priority items would be added as well i.e. now our sprint backlog will have 4 items of ID: 1,2,5 and 7 (IDs are from product backlog).

In the end we should have a complete setup of a user friendly application where users can choose and customize diaries along with completing a payment. In addition to this, we would have basic setup for admins where they can perform certain actions.

4. Estimation in story points

We are going to assign story points to each of our items relatively I.e., story points are assigned to tasks which require less time and high points to those which would take more time than others.

Hence, For Administration of accounts (PBI 1): 2 Story points

For Generation of Reports (PBI 2): 3 Story points

For Payment Integration (PBI 5): 8 Story points

For User Purchase history (PBI 7): 3 Story points
